**A short story by Shanthi**

I thought I was dreaming this morning, a little after 6. I heard the garage door open, and then the sound of the Healey engine. Anil took off with our blue/gray Healey! He returned after 20 minutes with a big smile. The Healey had a problem with the 'overdrive'. The 'tunnel' was opened two weeks back to fix the gear box with a small spring and some small metal balls.

At that time, by mistake, the overdrive cables disconnected. Last night, Anil opened the tunnel and reconnected the cables. This morning's test drive was successful. The over drive worked! You guessed right—tomorrow morning I will have to get ready by 6am for a Healey drive. I do not mind as we will get 'mileage points'.

After running out of gas a few weeks ago, a neighbor and I rushed the gas to Anil. The car still would not start—air in the system. Our neighbor helped and all was fine. Thank God for a Healey expert nearby.

Anil will be smiling on his way to work this morning—he FIXED his Healey and went for a drive!!!

A note from the Publisher:

This is my first attempt at Publisher. Please bear with me. I hope it will improve as time goes on. I have some big shoes to fill with Mike's past newsletters

Wanted everyone to get a an idea of what is coming up and to read the great story by Shanti. I think most of us can relate to her experience. What fun having a Healey is!
